It's Electric!

Homework Menu

Here is our half-termly Homework Menu linked to our spring term 2 science topic - *It's Electric!*

As well as reading daily at home and practicing times tables, we are once again using our successful '**Homework Menu**'.

Choose **two** activities from the selection of tasks below to complete by the end of the topic.

<p>Look at the different home equipment below. None of these appliances can work without electricity to power or charge them. Rank the items in order of the most important to the least important in your home.</p> <p>Challenge: How did you choose the two most important items?</p> 	<p>Take a look around your home. What objects in your home need electricity to work? What doesn't need electricity?</p> <p>Make a list of each.</p>	<p>Look at the BBC Bitesize website on electricity: https://www.bbc.co.uk/bitesize/topics/zj44jxs Work your way through the different videos and activities.</p>
<p>Invent your own electrical item that has not yet been invented! Explain how it would be used, with pictures and labels.</p>	<p>What electrical appliances do you have at home? What might people have used as alternatives before electricity was discovered?</p>	<p>Play this online electrical safety game: https://www.switchedonkids.org.uk/electrical-safety-in-your-home</p>

* Homework can be brought into school to display in our class Homework Gallery and / or be uploaded to Seesaw *
